

## ***Campanula carpatica*** ***Pearl Deep Blue***

Carpathian Harebell

### ***Culture guide***

**Uses:**

Pots, Hanging Baskets, Mixed Containers and  
Landscape

**Exposure:**

Sun

**Garden height:**

7" / 18 cm

**Sowing method:**

Raw seed: sow 6-8 seeds / plug; Pelleted seed:  
sow 2-3 pellets / plug

**Germination:**

Optimum conditions for seedling development,  
beginning on the day of sowing until radical  
emergence. Expect radicle emergence in 10-12  
days

**Fertilization:**

Sensitive to high EC in the early stages so  
maintain and EC less than 0.5 for the first 10-14  
days until germination is complete.
