

Campanula cochleariifolia Alpine Breeze

White

Item no.: H1250/P

Height

13cm

Exposure

Sun

Seed form

Raw Seed, Pelleted Seed

Uses

Landscape, Rockery

Culture guide

Usage

Pots and combinations

Sowing method

5-7 seeds per plug, sowing in final pot is possible

Germination

Germinates in 14-30 days at 65-72 °F (18-22 °C). Cover seed lightly with vermiculite after sowing.

Growing on

Transplant plugs after 9-10 weeks. Grow on at 55-65 °F (13-18 °C) in a well-drained, alkaline medium. Vernalization is not required for flower initiation.

Media

pH: Maintain media pH of 5.5-5.8, EC: <0.5

Temperature

Maintain temperatures of 18-22 °C.

Stage I Starts with the radicle breaking through the testa. The roots are touching the medium. Ends with fully developed cotyledons.

Stage II Starts from fully developed cotyledons. Ends with the fully developed true leaf or true leaf pair.

Stage III Starts from the fully developed true leaf or true leaf pair and ends with 80% of the young plants being marketable.

Stage IV All young plants are ready for sale and in the process of being hardened off. This stage lasts about 7 days.

The cultural recommendations are based on results from trials conducted under Central European conditions. Different conditions in other parts of the world may lead to deviations in results achieved.
