

Viola wittrockiana  ${\sf F}_1$ 

# Inspire® DeluXXe

# **White Blotch**

Item no.: VW0611R/E

### **Leading series in extra large-flowered Pansies**

- Huge, early and long lasting flowers
- Unmatched uniformity in habit and timing
- Superior outdoor performance
- Perfect for late summer / early fall production

Crop Time	Autumn: 12 - 14 weeks
Height ∅	7" / 18 cm
Width Ø	7 " / 18 cm
Exposure	Sun
Seed Form	Raw Seed, BeGreen Priming
<b>Product Use</b>	Packs, Pots, Mixed Containers, Landscape, Mass Plantings
Family, Origin	Violaceae, Europe
Minimum Germ. Rate	90 %

# **TECHNICAL GUIDE**

Viola wittrockiana F₁ Inspire® DeluXXe

#### Usage

Packs, Pots, Mixed Containers and Landscape/Mass plantings

#### Sowing method

1 seed per plug

#### Germination

Optimum conditions for seedling development, beginning on the day of sowing until radicle emergence. Expect radicle emergence in 2-4 days.

#### **Temperature**

65-68 °F (18-20 °F) until radicle emergence, then lower the temperature gradually to 62-65 °F (17-18 °C).

#### **Fertilization**

Begin feeding early using a calcium based fertilizer at lower rates to keep the an adequate amount of calcium and nitrogen supplied to the seedlings. On days 5-7 begin feeding with a calcium based fertilizer (14-2-14, 13-2-13, 15-5-15, 17-5-17) at 50-60 ppm. Maintain the EC between 0.5 and 0.75. Keep phosphorous levels between 6-8 ppm and boron supplied at 0.5 ppm.

#### **Expert Tip**

Maintain pH levels below 5.8 to avoid outbreaks of thielaviopsis and boron deficiensies. When the plugs are ready for transplanting, do not hold them as they can get root bound.

#### - Julian, Area Sales Manager

Stage I Starts with the radicle breaking through the testa. The roots are touching the medium. Ends with fully developed cotyledons. Stage II Starts from fully developed cotyledons. Ends with the fully developed true leaf or true leaf pair.

 $Stage\ III\ Starts\ from\ the\ fully\ developed\ true\ leaf\ or\ true\ leaf\ pair\ and\ ends\ with\ 80\%\ of\ the\ young\ plants\ being\ marketable.$ 

Stage IV All young plants are ready for sale and in the process of being hardened off. This stage lasts about 7 days.

The cultural recommendations are based on results from trials conducted under Central European conditions. Different conditions in other parts of the world may lead to deviations in results achieved.
