

# Tagetes erecta F? Discovery Mix

Item no.: W1731/C/D

## Crop Time

Spring: 8 - 10 weeks

## Height

23cm

## Exposure

Sun

## Seed Form

Raw Seed, Coated Seed, Detailed Seed

## Best Uses

Bedding, Landscape

## Culture guide

### Usage

Bedding, border, mixed container, summer pots

### Sowing method

1 seed per plug

### Germination

Stage I : 2-3 days at 72-75 °F (22-24 °C). Sow in media with very low soluble salt levels and pH 6.0-6.5. Cover seed lightly with vermiculite after sowing to maintain moisture levels. Keep soil slightly moist but not wet. Light is not required for germination. At the end of stage I the radicle will have emerged and the cotyledons begin to unfurl.

## **Growing on**

4-5 weeks after sowing transplant 1 plant into 10 cm (4") pots or packs. Transplant African Marigold plugs before they become root bound. Delays in transplanting may induce premature flowering.

## **Media**

Use a well-drained, disease free, soilless medium with a pH of 6.2 -6.5; do not allow to fall below 6.0 or Iron or Manganese toxicity may result.

## **Temperature**

18-23 °C (64-73 °F) days, 13-18 °C (55-64 °F) nights. Temperatures that are too low are a cause for a poor quality of the first flowers, too high temperatures encourage flower heads to be reduced in size. Plants for early selling should be hardened slowly at 10-13 °C (50-55 °F). *T. erecta* does not tolerate frost.

---

Stage I Starts with the radicle breaking through the testa. The roots are touching the medium. Ends with fully developed cotyledons.

Stage II Starts from fully developed cotyledons. Ends with the fully developed true leaf or true leaf pair.

Stage III Starts from the fully developed true leaf or true leaf pair and ends with 80% of the young plants being marketable.

Stage IV All young plants are ready for sale and in the process of being hardened off. This stage lasts about 7 days.

The cultural recommendations are based on results from trials conducted under Central European conditions. Different conditions in other parts of the world may lead to deviations in results achieved.
