High-End Seed Treatments for Faster Turnaround

Seed Technology by Benary

Beauty inside – and out. The Cutting Edge

We are committed to making your products easier to grow and more profitable for you.

Seed technology by Benary helps you to:

- Increase your yields
- Reduce production costs
- Improve vigor
- Produce full, uniform plug trays
- Plan reliable production
- Gain sustainable, environmentally friendly inputs

Who Says It's not Easy Being Green?

Excellent visibility of BeGreen seed

Seed Technology by Benary

"BeGreen" Seed Priming and Pelleting

- Faster germination
- Higher uniformity
- Easier sowability
- Better visibility on soil
- Precision sowing
- Higher yields
- Improved cultivation efficiency
- Increased profitability

Astilbe arendsii

All Astilbe Series

(Astary®, Rhapsody, Showstar®)

Your Advantages:

- BeGreen Pellet with new formula
- Pellets are easy to sow and offer better visibility on soil

BeGreen ApeX Pelleted Seed

Raw Seed

Visibility of BeGreen Pelleted Seed vs. Raw Seed on soil

BeGreen Pelleted Seed

Echeveria peacockii

Urban

Your Advantages:

- BeGreen Pellet with new formula
- Pellets are easy to sow and offer better visibility on soil as rawseed is tiny

Visibility of BeGreen Pelleted Seed vs. Raw Seed on soil.

Helianthus annuus

Bert® & Sonja®

Your Advantages:

- Coated Seeds have a higher flowability and better visibility on soil
- Coating-Mixture is completely eco-friendly and FibL*-certified

BeGreen ApeX Pelleted Seed

Raw Seed

Visibility of BeGreen Pelleted Seed vs. Raw Seed on soil

BeGreen Coated Seed

Germination:

^{*} European certification for organic products of the Research Institute of Organic Agriculture (www.fibl.org)

Achillea ptarmica

Marshmallow

Your Advantages:

- BeGreen Pellet with new formula
- Pellets are easy to sow and offer better visibility on soil

BeGreen Pelleted Seed

Raw Seed

Visibility of BeGreen Pelleted Seed vs. Raw Seed on soil

Aquilegia hybrida F,

Spring Magic®

- Primed seed germinates faster compared to raw seed
- Increased seedling fresh weight
- Seedlings are more uniform

Arabis caucasica

Catwalk

Your Advantages:

- Perfect visibility of pelleted seed vs. dark raw seed
- BeGreen Pellet with new formula eco-friendly
- Pellets are easy to sow and offer better visibility on soil
- Precision sowing

BeGreen Pelleted Seed

Raw Seed

Visibility of BeGreen Pelleted Seed vs. Raw Seed on soil.

BeGreen Pelleted Seed

Germination:

Dianthus gratianopolitanus

RoseQuartz

- Solves the problem of "flaky" raw seeds
- Pellets are easy to sow and offer better visibility on soil
- Better flowability

Echinacea purpurea

PollyNation

- Faster germination and higher total germination
- Plants are more uniform and bigger

Gaillardia x grandiflora

Arizona

Your Advantages:

- Coated seeds are easier to sow than raw seeds and have a higher visibility on soil
- Coating-Mixture is completely eco-friendly and FibL*-certified
- Advanced detailing prior to coating to maximize flowability

BeGreen Coated Seed

Raw Seed

Visibility of BeGreen Coated Seed vs. Raw Seed on soil

BeGreen Coated Seed

Germination:

^{*} European certification for organic products of the Research Institute of Organic Agriculture (www.fibl.org)

Gaultheria procumbens

Merry Berry

- BeGreen Pellet with new formula eco-friendly
- Stable germination less susceptible to changes in growing conditions
- Pellets are easy to sow and offer better visibility on soil

Gazania rigens F,

Zany

Your Advantages:

- Coated seeds are easier to sow than raw seeds and have a higher visibility on soil
- Coating mixture is completely eco-friendly and FibL*-certified

Raw Seed

Kniphofia uvaria

Flamenco

- Primed seed germinates faster in comparison to raw seed
- Increased number of usable plants
- Seedlings are more uniform
- Overall increased plant vigor solid thicker stems – increased seedling fresh weight

Primula elatior F,

Crescendo[®]

Your Advantages:

- Primed seed germinates faster compared to raw seed
- BeGreen seedling emergence is faster compared to standard priming
- Increased seedling fresh weight

BeGreen

Primed Seed

Rudbeckia hirta

All Rudbeckia hirta Varieties

(Amarillo Gold, Autumn Colors, Denver Daisy, Maya, Pawnee Spirit, Prairie Sun, Sonora, Toto® Varieties)

Your Advantages:

BeGreen Pelleted Seed

Visibility of BeGreen Pelleted Seed vs. Raw Seed on soil

- BeGreen Pellet with new formula eco-friendly
- Pellets are easy to sow and offer better visibility on soil
- Enhanced pre-calibration for better germination

Scabiosa caucasica

Fama[®]

Your Advantages:

- Coated seeds are easier to sow than raw seeds and have a higher visibility on soil
- In contrast to our former coating, BeGreen coating mixture is completely eco-friendly and FibL*-certified

Visibility of BeGreen Coated Seed vs. Raw Seed on soil

BeGreen Coated Seed

Germination:

^{*} European certification for organic products of the Research Institute of Organic Agriculture (www.fibl.org)

Sedum

All Sedum Varieties

(Lizard, Oracle, Spirit, Voodoo)

Your Advantages:

- BeGreen Pellet with new formula eco-friendly
- Pellets are easy to sow and offer better visibility on soil
- Precision sowing

BeGreen Pelleted Seed

Raw Seed

Visibility of BeGreen Pelleted Seed vs. Raw Seed on soil

BeGreen
Pelleted Seed

Sempervivum

Hippie Chicks

Your Advantages:

- Completely BeGreen Combi product: BeGreen ApeX Pelleted
- ApeX highly increased germination efficiency
- Seedlings are more uniform
- Precision sowing

BeGreen ApeX Pelleted Seed

Raw Seed

Visibility of BeGreen ApeX Pelleted Seed vs. Raw Seed on soil

Verbena speciosa

Imagination®

- Faster germination of primed seed, amount of useable plants is higher than raw seed
- Better uniformity of primed seed
- Primed seed offers germination at lower temperature (20 °C) much faster

Viola cornuta F,

Admire®

- Primed seed germinates faster compared to raw seed
- Seedlings are more uniform
- Better performance under suboptimal conditions (i.e. at higher temperature above 25 °C)
- Increased number of useable plants

Viola wittrockiana F,

All Pansy Series

(Cats® Plus, Highflyer, Inspire®, Inspire® Plus, Inspire® DeluXXe)

- Primed seed germinates faster compared to raw seed
- Seedlings are more uniform
- Better performance under suboptimal conditions (i.e. at higher temperature above 25 °C)
- Increased number of useable plants
